

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Requirements Not Met For:
NORTHWEST HARRIS COUNTY MUD 19

Dear Residents,

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During June 01, 2023 to June 30, 2023 we did not complete all testing for coliform bacteria according to TCEQ rules and regulations and therefore cannot be sure of the quality of your drinking water during that time.

WHAT SHOULD I DO?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

WHAT IS BEING DONE?

The lab that was required to collect all routine samples has been terminated and all routine samples have been collected since this error. Northwest Harris County MUD 19 has collected every required coliform sample since the day of the violation and is no longer in violation. The Districts disinfectant levels have been within limits each month since and before this incident leading us to believe the water was and continues to be safe.

If you have any questions regarding this matter or need further information, contact: **Natalia Espitia** with H2O Innovation at (281) 355-1312 or at 2200 Sciaaca Road, Spring, TX 77373.

Please share this information with all people who drink this water, especially those who may not have received this notice directly. (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public or distributing copies by hand or mail.
