

Mandatory Language for Monitoring and Reporting Violation Chemical Sampling

CHEMICAL MONITORING, ROUTINE MAJOR

The **NORTHGATE CROSSING MUD 2** water system **PWS ID TX1013078** has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Public water systems are required to collect and submit chemical samples of water provided to their customers and report the results of those samples to TCEQ on a regular basis.

We failed to monitor and/or report the following constituents:

- **METALS REVISED**

These violations occurred in the monitoring period(s):

- **Triennial Sampling 01/01/2022 - 12/31/2024**

Results of regular monitoring are an indicator of whether or not your drinking water is safe from chemical contamination. We did not complete all monitoring and/or reporting for chemical constituents, and therefore TCEQ cannot be sure of the safety of your drinking water during that time.

We are taking the following actions to address this issue:

All required samples were collected by the public water system. The violation resulted from a delinquency with the contracted state laboratory, which delayed the reporting of results. All outstanding fees have since been paid, and the laboratory has released the results to the Texas Commission on Environmental Quality. **NORTHGATE CROSSING MUD 2** has reviewed and updated its laboratory coordination and contact procedures to prevent future delinquency and ensure timely reporting compliance.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact:
