

**Mandatory Language for Monitoring and Reporting Violation
Chemical Sampling**

CHEMICAL MONITORING, ROUTINE MAJOR

The **WEST PARK MUD** water system **PWS ID TX1011930** has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Public water systems are required to collect and submit chemical samples of water provided to their customers and report the results of those samples to TCEQ on a regular basis.

We failed to monitor and/or report the following constituents: **RAD, RADIONUCLIDES**

This/These violation(s) occurred in the monitoring period(s) **07/01/2024 – 09/30/2024**

Results of regular monitoring are an indicator of whether or not your drinking water is safe from chemical contamination. We did not complete all monitoring and/or reporting for chemical constituents, and therefore TCEQ cannot be sure of the safety of your drinking water during that time.

We are taking the following actions to address this issue:

All required samples were collected by the public water system. The violation resulted from a delinquency with the contracted state laboratory. Invoices were not received, which delayed the reporting of results. Upon identification of the issue, all outstanding fees were paid, and the laboratory has since released the results to the Texas Commission on Environmental Quality. Contact information has been reviewed and updated to ensure proper invoice routing and prevent future occurrences.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
